GSA Automotive's Wheelchair Van Program

Introduction to the Wheelchair Van Program

Meeting the needs of all GSA customers is a goal of ours. And that's why GSA Automotive offers you use of the Wheelchair Van Program. Wheelchair vans provide dependable, safe transportation for wheelchair users, as well as ambulatory individuals.

The wheelchair vans we offer are full-size, after-market conversions customized to specific requirements. Typically, our modifications include a raised roof, a wheelchair lift, fold-away seating, and a restraint system. And we also offer you a variety of seating configurations and floor plans!

Benefits and Services

Wheelchair vans are available in various makes and models. Available features include:

- Fiberglass top;
- Reinforced steel roof cage for rollover protection (FMVSS 220 compliant);
- Raised wheelchair doors;
- Platform wheelchair lift;
- Fold-away seating;
- Wheelchair restraint system;
- Occupant restraint system;
- Array of seating configurations; and
- Other equipment and accessories (which may be available, upon request).

When Ordering

To requisition a van, you must submit GSA Form 1781 – Motor Vehicle Requisition. Obtaining your copy of the form is easy. Simply visit www.gsa.gov/forms, enter "1781" in the "Find a Form" field, and click the "Search" button. The site will take you to a printable PDF of GSA Form 1781. If you do not have Internet access, call (703) 605-CARS(2277) and request to have a copy of the form sent to you.

On the form, you must indicate the contractor you prefer and the seating configuration you desire. (Current providers include Accubuilt, Incorporated, and American Bus Sales.) If this information cannot fit into the allotted space, an addendum may be submitted along with the requisition to indicate your contractor, engine type (gas or diesel) and seating-configuration preferences. (Note: Due to the unique nature of these vehicles, AutoChoice cannot be used to place orders.)

While completing the form, pay special attention while performing the following steps.

- Under portion 4b – One of the following numbers must be specified:
 - “281” for configuration 1;
 - “282” for configuration 2; or
 - “283” for configuration 3.
- Under portion 5 – please specify the following:
 1. Enter “WHEELCHAIR VAN”;
 2. Make and model identified in specification;
 3. Options selected in specification (paragraph 6.2) if applicable; and
 4. Other equipment and accessories not found in the specification may be available upon request.
- After completion – fax GSA Form 1781 to (703) 605-9868 or mail it to:
General Services Administration
Automotive Acquisition Support Division (QMAA)
200 Crystal Drive, Suite 1006
Arlington, VA 22202-3730
